DETAILED ACTION

1. This action is responsive to communication filed 11/10/08.

Response to Amendment

2. Applicant's arguments, see remarks, filed 11/10/08, with respect to pending claims have been fully considered and are persuasive. The art rejection of the pending claims has been withdrawn. However, in view of *Bilski*, a 35 USC 101 rejection for process claims 1 and 11-24 have been provided.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 12-24 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent¹ and recent Federal Circuit decisions² indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to a particular machine or apparatus, or (2) transform a particular article to a different state or thing. This is referred to as the "machine or transformation test", whereby the recitation of a particular machine or transformation of an article must impose meaningful limits on the claim's scope to impart patent-eligibility (See *Benson*,

¹ *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

² *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008).

Art Unit: 2624

409 U.S. at 71-72), and the involvement of the machine or transformation in the claimed process must not merely be insignificant extra-solution activity (See *Flook*, 437 U.S. at 590"). While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform an article nor positively tie to a particular machine that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. The steps of acquiring a 3D image using a "camera inherently" and reproducing image with a "compute graphic" do not impose meaningful limits on the claim's scope, in that these steps amount to insignificant pre and post solution activity common to nearly every image processing method, and they have no impact on the "estimating surface reflectance thereby generating a bump map" that constitutes the basic inventive concept. The step of "reproducing image with computer graphics" is intended use, and not a positively recited step in the overall process.

Allowable Subject Matter

4. Claims 25, 35-49, 50 and 60-66 are allowed.
5. The following is an examiner's statement of reasons for allowance for independent claims 25 and 50. The prior art fails to disclose estimating surface reflectance properties of the real existing object based on 3D image data obtained and polygon mesh thereby generating a bump map. This feature in combination with the other features are not taught in the prior art. Claims 35-49 and 60-66 depend on claims 25 and 50, respectively. Therefore are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
